EDUCATION

Aug. 2025 – Jul. 2029

Renmin University of China, Beijing, China

B.Eng. in Artificial Intelligence, Gaoling School of Artificial Intelligence (Expected)

Selected Coursework: C++ Programming, Advanced Algebra I, Artificial Intelligence and Python Programming, Discrete Mathematics, Calculus I

RESEARCH INTERESTS

Embodied World Models; Vision-Language-Action Models and Robot Learning; Multimodal Agents for Long-Horizon Reasoning, Planning, and Interaction

INTERNSHIP EXPERIENCE

Jul. 2026 – Present

Tsinghua University

Institute for Interdisciplinary Information Sciences (IIIS)

Research Intern; Advisor: Mengdi Xu

Jul. 2026 – Present

Litchi Lab

Intern

RESEARCH & SELECTED PROJECTS

Apr. 2026 – Present

Semantic-Based Medical Image Retrieval

Core Team Member, Qiushi Academic Project, Renmin University of China

Advisor: Assoc. Prof. Wenping Zhang

- Conducted literature review on semantic medical image retrieval and knowledge-enhanced representation learning; contributed to the research proposal, technical plan, and presentation materials.
- Contributed to model design and PyTorch implementation for cardiac image retrieval using real-world clinical data; project recommended for the National College Student Innovation Training Program.

May 2026 – Jul. 2026

Physics-Informed Video Prediction for Ink Diffusion in Water

Course Project, Introduction to Deep Learning

Advisor: Prof. Suyun Zhao

- Co-developed a physics-informed video prediction model in a four-member team; handled data processing and implemented the physics-informed prediction module.
- Reduced test MSE by **28.6%** over the TAU-only baseline (280 to 200), achieving **0.9420 SSIM** and **32.11 dB PSNR** through iterative training and controlled ablation studies.

Mar. 2026

Logic Formula Toolkit and Benchmark Suite

Course Project, Discrete Mathematics

- Served as the primary developer of a Python toolkit for propositional formula parsing, truth-table generation, postfix evaluation, and canonical normal forms.
- Implemented and benchmarked multiple C++ evaluation methods, including OpenMP and SIMD-optimized variants; designed the benchmark pipeline and performance experiments.

Dec. 2025 – Mar. 2026

Mirror — 2D Fighting Game

Team Project, 9th “Bambu Lab Cup” Tsinghua University Software Design Competition

- Co-authored the game design document and implemented character-control and combat systems in Unity, delivering a complete, playable competition entry.

SELECTED AWARDS & HONORS

Nov. 2025

Bronze Medal, 2025 ICPC Asia Wuhan Regional Contest (50th ICPC)

Mar. 2026

400/500, 41st CCF Certified Software Professional (CSP) Certification
Ranked 1st among participants from Renmin University of China

2022, 2023

First Prize, National Olympiad in Informatics in Provinces (NOIP), Guangxi

SKILLS & LANGUAGES

Programming & Tools: C++, Python, PyTorch, Linux, Git, LaTeX

Languages: Chinese (Native), English (CET-4: 620/710; CET-6: 603/710)
